

SKOOG

EASY TO PLAY MUSICAL INSTRUMENT

Getting Started

Get Skoog App

Download the Skoog App.
Search your app store for “**Skoog**”

Before using please ensure you
are running **iOS 11 or higher.**

Get Connected

NOTE: Connect only via the Scoog app. Do not pair your Scoog with your device. If promoted to pair select 'cancel'. Your Scoog will still connect and function normally

Open the Scoog App and follow the In-App instructions to **get connected via Bluetooth**.

For help tap the **Question mark icon** (?) on the main app page.

The help page within in the app has detailed guides on connecting your Scoog and troubleshooting.

Ideas to get you started

Discover More

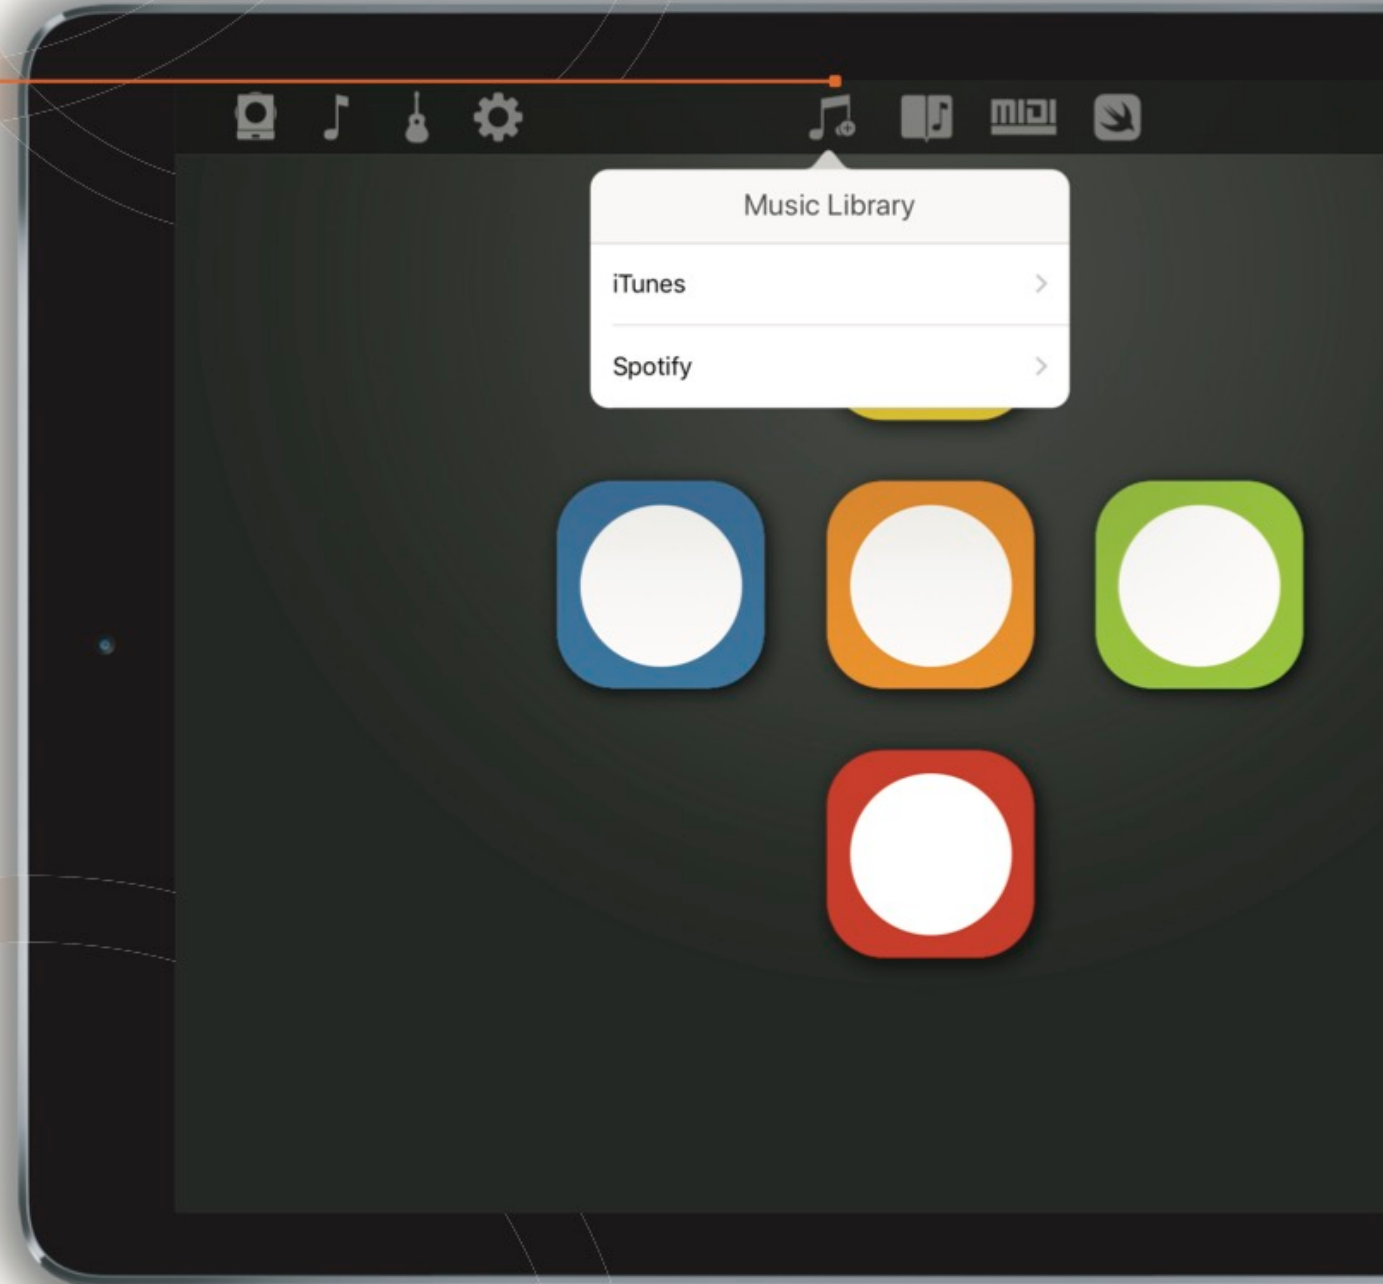

The **Music library** allows you to jam along with songs from your media library in either **iTunes** or **Spotify**.

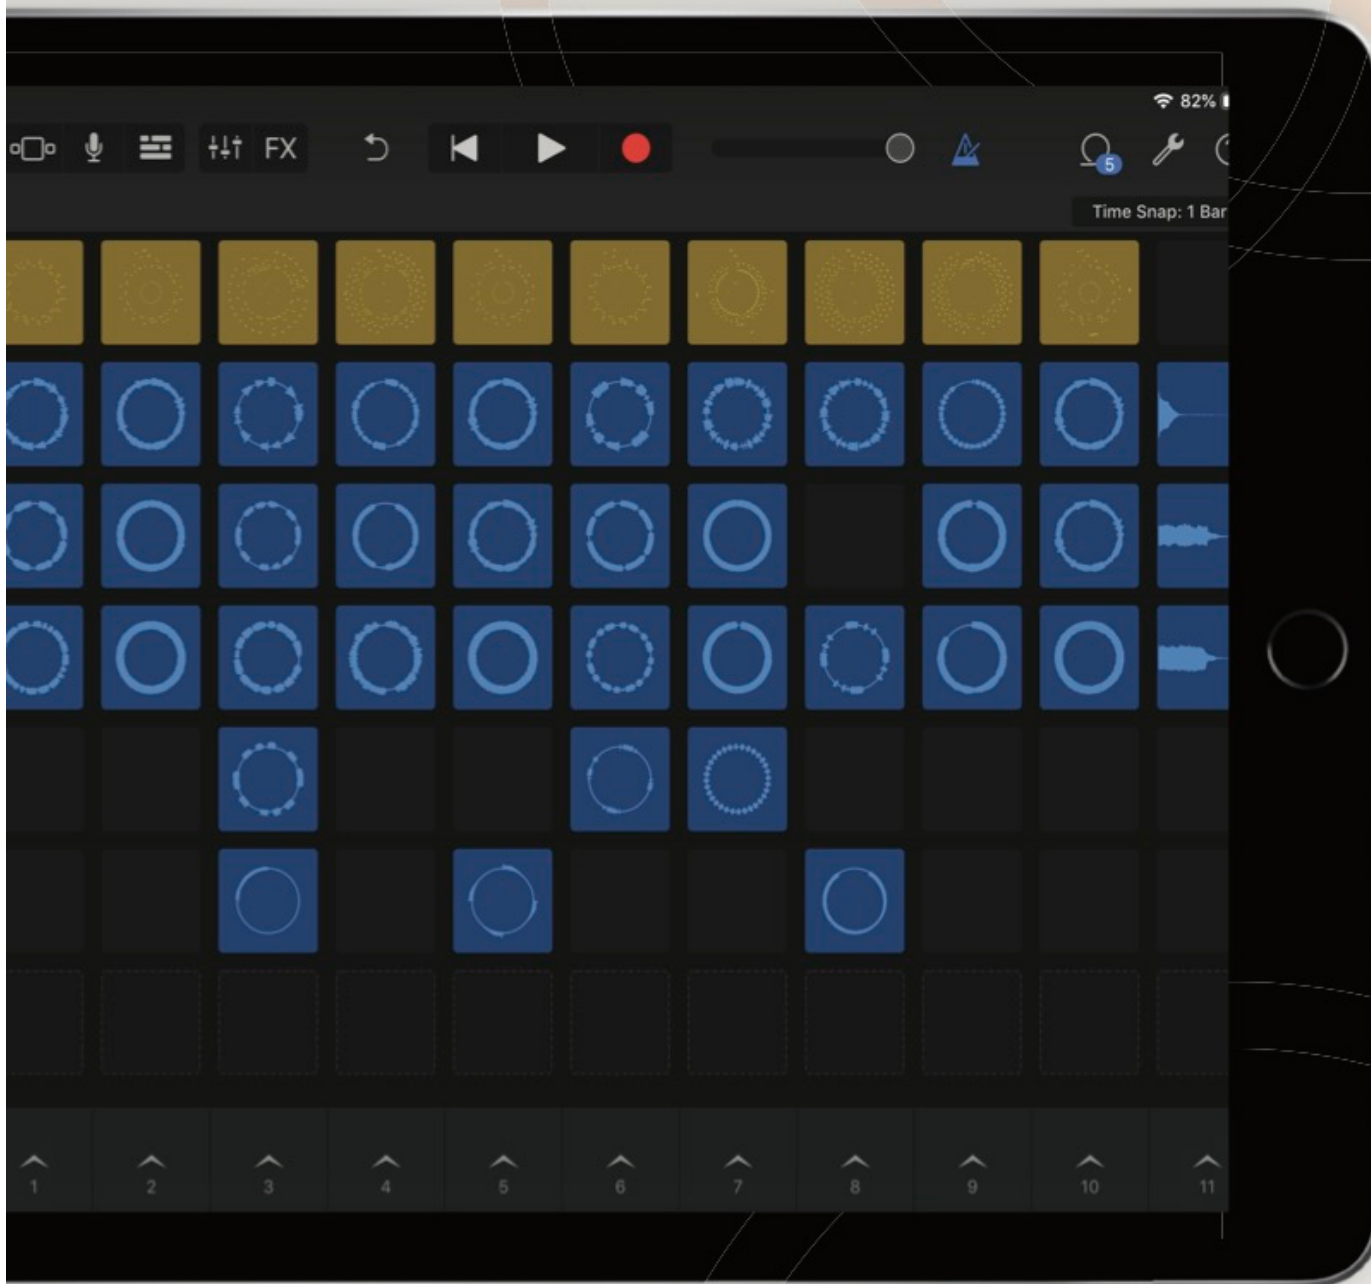

To use iTunes or Spotify with your Skoog, open the **Music Library Menu** and select your chosen library. You can then select a song to jam along to.

USE BACKING TRACKS

Spotify iTunes PDF

Skoog can connect to other **MIDI compatible Apps** like GarageBand. Turn your Skoog into a controller, play new Instruments, create live loops to remix a track or create your own loops in **GarageBand**.

SKOOG GARAGEBAND PDF

To connect to **MIDI compatible Apps** open the **MIDI Menu** within the Skoog app. Make sure MIDI is turned on and Skoog audio is off. Your skoog will now be ready to connect to other MIDI Apps.
